# Procurement - Revised EDD Policy

**Document Type:** Policy Knowledge Document

## Purpose

Define the authoritative data source and interpretation rules for Estimated Delivery Date (EDD) and Revised EDD questions.

## Policy 1 - Standard EDD

Standard EDD must be obtained from procurement.po.expecteddeliverydate.

## Policy 2 - Revised EDD

Revised EDD must be obtained from procurement.po_asn_history.createddatetime using the latest applicable row where action_taken = true.

## Policy 3 - Source Separation

The standard EDD field must not be substituted for Revised EDD when the user explicitly asks for a revised EDD.

## Policy 4 - Latest Applicable Record

When multiple qualifying PO ASN history records exist, the latest record with action_taken = true must be used.

## Context

These policies apply to procurement data queries involving purchase orders and estimated delivery dates.

## Answering Guidance

If the required source record cannot be identified, the response should state that the available information is insufficient rather than infer a revised EDD.
